Subject: SCC Redlines to Paragraph for Call Today

Importance: High

We are proposing the following:

Path and route diverse Interconnections for 911/E-911 shall be made at the CLEC IP, the Verizon IP, or other points as necessary and mutually agreed, and as required by law or regulation. SCC can order diverse routing for 911/E-911 circuits where facilities are available. When Verizon facilities are available, Verizon will comply with diversity of facilities and systems as ordered by SCC, except where such diversity can only be provided by means of new build-out. Where there is alternate routing of 911/E911 calls to a PSAP in the event of failures, Verizon shall make that alternate routing available to SCC.
